

小鼠抗 mPlum 单克隆抗体

- 中文名称： 小鼠抗 mPlum 单克隆抗体
- 英文名称： Anti-mPlum mouse monoclonal antibody
- 相关类别： 标签抗体
- 储 存： 冷冻（-20℃） 避光
- 宿 主： Mouse
- 抗 原： mPlum
- 反应种属： mPlum
- 标 记 物： Unconjugate
- 克隆类型： mouse monoclonal

技术规格

Background:	mPlum are preferred for in vivo imaging, and avoid the natural green autofluorescence found in plants and animals. Living Colors mPlum is a Fruit Fluorescent Protein which was developed in Dr. Roger Tsien's lab by directed mutagenesis of mRFP1, a monomeric mutant of DsRed. It has demonstrated stable expression, and perform successfully in numerous fusion applications.
Applications:	WB
Name of antibody:	mPlum
Immunogen:	Purified mPlum protein expressed in HEK293 cell
WB Predicted band size:	26 kDa
WB Positive control:	HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY mPlum (right lane) cDNA for 48 hrs and lysed

WB Recommended dilution:	1000-5000
